EST-XLOGIN-8C

Scheda 8 ingressi logici (control slot)

Overview

The logical input card for a function or control slot has 8 control inputs which may receive signals from other systems in order to trigger a desired reaction of EST ENT VES system. Inputs of an EST-xLogIN-8c/f card offer two modes of operation: contact mode (short / open contact) and monitor mode in which in addition to contact mode function, short circuit and opening of the cables connected to the card are detected.
