DB-01D

DC9000 Series standard point detector base with diode

General

The DB-01D is a common mounting base for GST conventional (DC) series detectors. It provides mechanical fixing and electrical connection for these devices. When used together with an Active End-of-Line unit such as the DP-9907, the diode base supports head out functionality under BS5839 so that even when a detector is removed from the base, the remaining devices in the zone continue to operate normally.

The DB-01D has 4 terminals

Details

- Common for all GST DC series detectors
- Supports detectors locking to prevent unauthorised removal
- Easy to install with standard mounting options

DB-01D

DC9000 Series standard point detector base with diode

Technical specifications

General

Compatibility	GST DC-9000E systems
Connectivity	Zone and remote indicator

Electrical

No. of cable cores	2 x zonal, 2 x remote LED
Terminals	4

Physical

Physical dimensions	100 x 14 mm (Ø x H)
Colour	White
Mounting type	Ceiling mount
Cable entries	1
Material (body)	ABS

Environmental

Vandal proof	No
Environment	Indoor

Regulatory

Compliancy	CE
Standards	EN54 (with relevant detector)

Compatible products

Category	Reference	Description
Detection device	DC-9101E	DC9000 Series conventional multisensor fire detector
Detection device	DC-9102E	DC9000 Series conventional optical smoke detector
Detection device	DC-9103E	DC9000 Series conventional heat detector
